

The SSG Air Cleaner is Designed for the Worst Dust Conditions

This mining haul truck is outfitted with two Donaldson SSG Air Cleaners.

Simpler service and reliable filtration performance all in one package!

The Donaldson SSG Air Cleaner is equipped for heavy-duty, two-stage filtration and is available with standard cellulose media or with Ultra-Web® advanced nanofiber technology for higher efficiency and capacity. The radial seal filters are composed of molded urethane end caps that slip easily on and off the outlet for fast and simple filter service. Built-in Donaclo™ pre-cleaning tubes separate up to 97% of incoming dust. The pre-cleaned dust is automatically ejected from the dust cup through the Vacuator™ Valve.

Shoptalk

Dust Dumpa Drop Tube Extension

When installed on the SSG dust cups on the lower assembly, the rubber connector vibrates during normal vehicle operation and gravity expels the pre-cleaned dust through the Vacuator™ Valve.

Features and Benefits

- Improves dust evacuation from the air cleaner
- Clear tube allows for visual inspection of dust collection
- Reduces air cleaner inspection time

Donaldson® Endurance

For extended air filter life, try our Donaldson Endurance™ Air Filters with Ultra-Web® Nanofiber Technology.
